Enhancing Retention for Nursing Assistants: Effective Strategies to Reduce Turnover

Tiffany Omann-Bidinger BSN, RN Director Neuroscience/Spine Unit

Sigma Theta Tau International - Kappa Phi Chapter Leadership Succession

Purpose Statement

Develop and implement a hospital-wide, evidenced-based recruitment and retention program to reduce turnover rates for Nursing Assistants (NAs).

Synthesis of Evidence

There is limited research on the recruitment and retention of Nursing Assistants (NAs) in the acute care hospital setting. The majority of evidence was level C and D. Themes that emerged included:

- Create Certified Nursing Assistants (CNAs) empowerment work teams
 - Strengthen work teams by initiating culture-shaping programs
- Develop an on-boarding program
 - Include 30-60-90 day interview with hiring manager
- Support a standardized and comprehensive Mentorship Program
 - Develop a formalized program for peer mentoring and support
- Develop a certified preceptor program
- Address inadequate wages and lack of benefits

Team Members

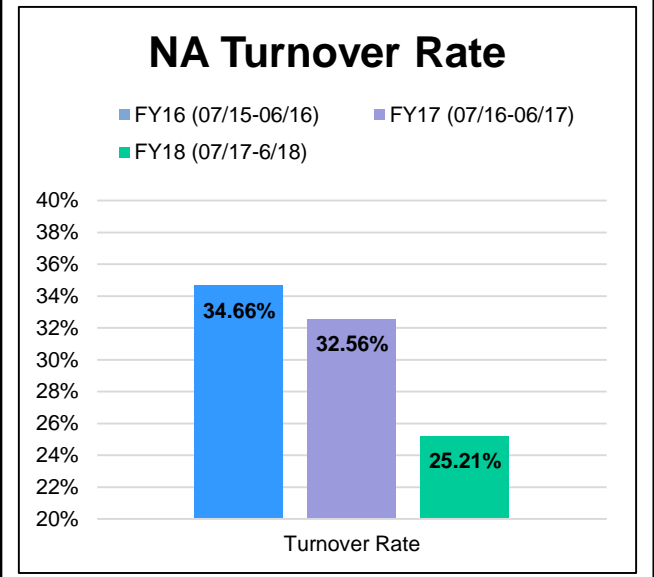

- Tiffany Omann-Bidinger BSN, RN
- Kirsten Skillings MA, APRN, CCRN-K, CCNS
- Tanya Mazzone MSN, RN, CNML
- Aleen Roehl BSN, RN
- Emily Zempel BSN, RN, BC
- Patty McNary PHR, SHRM-CP
- Jenny Krippner NA
- Lynette Hess NA
- Chris Thayer NA
- Anthony Fruth NA

Evidence-Based Practice Changes

- Strategy One: NA Retention-Focused Survey**
 - NAs completed a retention survey.
 - Questions focused on orientation/training, skill utilization, personal sense of accomplishment, supplies/equipment, working relationships, schedule, and reasons to stay and/or leave St. Cloud Hospital (SCH).
- Strategy Two: NA Focused Brainstorming Sessions**
 - NAs attended a brainstorming focus group.
 - Discussion points included floating, quality patient care, teamwork, recognition, respect, communication, consistency with supply locations, routines and expectations.
- Strategy Three: NA 30-60-90-Day Check-Ins**
 - Hiring manager met with NAs at 30, 60, and 90 days intervals.
 - Questionnaire was developed for hiring managers to gather qualitative feedback.
- Strategy Four: NA Retention Reward for 10 Years of Service**
 - To recognize employee commitment and loyalty to the department, NAs with 10 years of service were exempted from floating.
- Strategy Five: Termination Codes and Reasons**
 - Created termination coding expectations for managers.
 - Improved data abstraction related to reason for voluntary termination and turnover.
- Strategy Six: Interdepartmental Float Guidelines**
 - Created interdepartmental floating expectations which aligned with SCH Our Best Begins with Me culture framework for accountability.
 - Improved floating experience which positively impacted teamwork, patient care delivery, and effective communication.
- Strategy Seven: NA Partner Program**
 - Developed 12-month peer-to-peer mentoring program to foster skills and professional development.
 - Program connected newly hired NAs with a more senior NA, which fostered a culture of learning and allowed NAs to adapt quickly to the healthcare environment.

omann-bidinger@centracare.com

Pre/Post Measures

Implementation of evidence-based practice changes and strategies greatly improved overall retention rate for NAs, reducing turnover by 9.45%.
